

## When was the last time you felt comfortable about sitting on a public toilet?

It's an established fact that people are afraid to sit on public toilets. It's a risk people prefer not to take. Medical studies show that dangerous bacteria, including hepatitis and herpes can be found on the toilet seats of public and commercial restrooms.

One possible solution is a new and revolutionary idea called CLEAN COVER! With the simple wave of a hand, the Clean Cover Toilet Seat provides a fresh, clean, hygienic seat cover for each individual user.

### BEFORE Clean Cover™

### AFTER Clean Cover™

- Helps eliminate the spread of germs, disease, bacteria
- Eliminates the waste of toilet paper, paper towels, and those "ugly" tissue seat covers
- Reduces plumbing problems
- Promotes a clean and healthy image
- Saves water by eliminating extra flushes
- Provides protection and easy use for the elderly & disabled

## Remember the words "Clean Cover" and "Clean Cover Concept" We are a new and revolutionary idea in toilet seat protection!

Clean Cover fits on all standard toilets. The adjustable brackets make installation as simple as mounting a regular toilet seat. Replacement of the seat cover rolls takes less than a minute.

Locked away inside the Clean Cover ABS plastic housing, is a sanitary roll of Clean Cover Wrap.

An electronic counter tells you when a new roll is needed.

After each use, the seat cover is destroyed and can never be used again.

### Ideal for any shared toilet facility where health and easy maintenance are a must:

Hospitals, Clinics, Nursing Homes, Doctor's Offices, Health Clubs, Airports, Hotels, Casinos, Restaurants, Schools, Retail Stores, Office Buildings, Government Facilities and all other commercially shared toilets... including YOURS!

**Sample of Clean Cover Material**

Clean Cover Wrap is made of High Density Polyethylene and provides a clean hygienic seat cover with each spin!
